POMPTON PLAINS, NJ — It's said that you never get a second chance to make a first impression. And with [Ashley Norton](https://www.ashleynorton.com/) (https://www.ashleynorton.com/) entry hardware, you won't need one. The company presents their Rectangular Suite — a simple yet elegant entry set featuring a clean rectangular shape with a beveled edge. Designers and homeowners alike can select from an array of meticulously styled escutcheons, levers, and knobs to create a welcoming look reflective of their unique personality. Each element of the Rectangular Suite is handcrafted from art-grade bronze or solid brass. And with a variety of artisan-applied finishes to choose from, the suite complements and enhances the appeal of any façade.

"A home's entrance sets the tone for the experience visitors have inside and no element is more important than the entry hardware. Whether you choose to add soft curves or more modern, geometric shapes, the Rectangular Suite is an experience from the very first touch," says Ashish Karnani, Vice President of Ashley Norton.

More than just entry door hardware, the collection includes interior knob and lever sets, coordinating cabinet hardware and appliance pulls, sliding door sets, door hinges, window hardware, home accessories and more for a cohesive hardware look throughout the entire home. Plus, each piece is available in a wide spectrum of durable, resistant, and long-lasting finishes including today's popular Flat Black and Matt Black. The entire collection of Ashley Norton architectural hardware is available at leading kitchen and bath dealers throughout the United States.
